Dutch: native · **English:** very good

Profile

Programming graduate with practical experience helping others with IT issues and maintaining self-hosted websites and services since early 2023. My software development background helps me understand applications, databases and the systems they run on. I am seeking a junior ICT support and systems role where I can help users, learn business applications and grow into broader systems responsibilities.

Relevant Support & Systems Experience

Informal IT Support

Family, fellow students and fellow interns · Personal and educational settings

- Helped 15+ people with technical software and device problems, including support with Git, Docker and npm for fellow students and interns.
- Installed and reset Windows, set up Android devices and Google accounts, and helped with itsme configuration.
- Troubleshot HP printer issues, installed additional hardware components and corrected BIOS settings to get an older PC starting again.

Home Hosting & Systems — Jan 2023–Present

Personal projects · Synology NAS, Linux, Docker Compose, SSH, Cloudflare

- Host and maintain websites and services on a Synology NAS, including Jellyfin, Kavita, Forgejo and ddclient; use SSH and Docker Compose for configuration and deployment.
- Configured Cloudflare DNS records, dynamic DNS updates, a static local IP address and router port forwarding for self-hosted services.
- Set up a reverse proxy, HTTP headers and wildcard HTTPS certificates using acme.sh.
- Resolved a Kavita configuration-persistence issue by correcting its Docker volume mapping; investigated other application issues and shared findings on GitHub.

Webshop-PXL — Development & Hosting — Feb 2026–Present

School project continued independently · ASP.NET, Blazor, PostgreSQL, Docker

- Coordinated a three-student project, reviewed code, tracked development issues and wrote documentation; continue maintenance after the school project.
- Set up hosting on my NAS with Docker Compose and images from Docker Hub; configured Google sign-in through Google Cloud.

Key Technical Skills

Windows & Linux: Windows installation, resets, drivers, Chocolatey, Event Viewer; basic PowerShell use; Linux Mint, command line, SSH, package management and basic permissions.

Networking & security fundamentals: DNS, static IPs, port forwarding, Wi-Fi troubleshooting, reverse proxies, HTTPS certificates; personal Linux firewall rules and MFA setup.

Office applications: Word, Excel and Microsoft Teams meetings — user-level experience during education.

Applications & databases: Docker / Compose, SQL, PostgreSQL, MySQL, REST APIs and application debugging.

Issue tracking & documentation: GitHub Issues and Azure DevOps for school development projects; Git, technical documentation and handover notes.

Professional Experience

Junior Software Developer — Internship **Nov 2025–May 2026**

PXL smart-ICT · Hasselt

- Developed and maintained client web applications, including NaarSchoolInVlaanderen, Sint-Vincentius and DigitaalZorgkompas.
- Analysed and fixed reported application bugs and wrote technical documentation for maintenance and handover.
- Contributed to data imports and Docker configuration, collaborating with developers, a designer and a scrum master.

Operator **Dec 2023–Aug 2024**

Group Ceyssens · Heusden-Zolder

EMC Assistant **Mar 2021–Oct 2023**

Melexis · Tessenderlo

- Configured test setups and performed EMC tests with LabVIEW, TESEQ software, oscilloscopes and other laboratory equipment.
- Processed test data with Python and generated charts and reports.

Electrician **Oct 2020–Jan 2021**

Gielen Nv · Lommel

Electrician **Jul 2020–Aug 2020**

Kempische Bordenbouw · Balen

Selected Graduation Project

Sint-Vincentius App **Feb 2026–Jun 2026**

PXL smart-ICT / Hogeschool PXL · C#, Entity Framework, PostgreSQL, Docker, React

- Interviewed two branches about their existing spreadsheet workflows and proposed a common spreadsheet format for importing data into the application.
- Developed a data import tool, updated Docker configuration and migrated the application from single-tenant to multi-tenant architecture.
- Documented the application for maintenance and handover; continued graduation-project contributions after the internship ended in May.

Education

Associate Degree in Programming **Sep 2024–Jun 2026**

Hogeschool PXL · Hasselt · Graduated June 2026

Technical Secondary Diploma — Electrical Installation Techniques **Sep 2016–Jun 2020**

Provil · Lommel

Additional Technical Background

Programming: C# / .NET, Entity Framework, TypeScript, PHP / Symfony, Python, React and Vue. Experience with database migrations and application integrations.

Personal configuration project: github.com/LeviGoossensPXL/Awesome-Environments — PC and Linux environment configuration for easier setup and management.

Availability & Development

Available immediately. Able to commute to Antwerp by train or car; driving licence B. Flexible for occasional planned evening/weekend work and remote support outside standard office hours.

Motivated to develop professional user-support skills and gain practical experience in Microsoft 365 administration and Windows Server through onboarding and training.
